

EXTENSION ACTIVITY ON FUNDAMENTALS OF COMPUTERS & INTERNET

DATE : 28-08-2017

BRIEF REPORT

Students conducted an Extension Activity on “*Fundamentals of Computers & Internet*” at APSRMC High School, Krishnalanka, Vijayawada on **29-08-2017**.

Computer Education in schools plays an important role in career development. Computer with the internet is the most powerful device that students can use to learn new skills and more advanced version of current lessons. Schools around the globe are teaching basics of computers and internet to the students.

The usage of computers and internet is growing day by day at high speed. In almost all companies, schools and businesses, computers are used for official operations. New Technology tools like Google Classroom, Canva are coming up to help students to learn better.

Students trained High School students in different Computer Applications like MS-Word, Excel, and Paint etc. Students learned the usage of internet and different popular social networking websites. The hands on experience excited them a lot and they thanked the students and staff of SDMSMK for this interesting social activity.

Presentation about the Usage of Computers and Internet to School Students
