

Field Visit to RGCA – GIFT Tilapia Project

Date : 03-10-2026
Class : 30 students of I B.Sc Hons. Zoology, II B.Sc Hons. Zoology,
III B.Sc Hons Aquaculture

Brief Report: The Department of Zoology, organised an educational field visit to the Rajiv Gandhi Centre for Aquaculture (RGCA) as part of experiential learning for students.

The visit focused on the **GIFT (Genetically Improved Farmed Tilapia) Tilapia Project**, providing students with practical exposure to modern aquaculture practices, including **breeding, seed production, fish culture techniques and aquaculture management**.

Students actively participated in the learning sessions and gained valuable insights into the application of scientific knowledge in sustainable aquaculture. The interaction with technical experts also helped students understand the **scope, career opportunities and technological advancements in the aquaculture sector**.

The field visit served as an enriching academic experience, bridging the gap between **classroom learning and practical applications** in aquaculture.
