

DEPARTMENT OF BOTANY

Participation in Nano2Nature (N2N) Research Bootcamp

Date:23-10-2026

The Department of Botany actively participated in the Nano2Nature (N2N) Research Bootcamp, organised by the Department of Environmental Science and Engineering, SRM University–AP, Andhra Pradesh, on 23rd October 2026.

Students of I B.Sc. Botany, III B.Sc. Botany, and I B.Sc. Microbiology, along with faculty members, enthusiastically attended the workshop. The programme provided valuable exposure to the emerging applications of nanotechnology in environmental science, water research, and energy applications. Students gained insights into nanomaterials, water analysis, contaminant detection, advanced laboratory techniques, and innovative approaches to environmental sustainability.

The workshop enhanced students' scientific knowledge, research aptitude, and interdisciplinary learning by connecting nanotechnology with environmental protection and sustainable development.

I B.Sc. Botany, III B.Sc. Botany, and I B.Sc. Microbiology students participated quiz competition which was conducted by SRM university
